

# BRIDGE ENGINEERING

By  
J. S. Alagia

**Edition** : 8<sup>th</sup> Revised and Enlarged Edition – 1983  
**ISBN** : 9789380358420  
**Size** : 135 mm x 210 mm  
**Binding** : Half - cloth Hard-Bound  
**Pages** : 204 + 18 = 222

₹ 75.00

**BUY**

## ABOUT THE BOOK

This text-book aims at presenting the fundamental principles of Bridge Engineering. It is characterised by the clear, methodical and step-by-step treatment of the subject. Salient features of this book are: numerous diagrams, photographs, brief description and clear exposition. Typical questions follow each chapter.

Throughout this book the chief aim has been to illustrate the subject matter fully with suitable diagrams and by direct treatment of the subject matter.

The book is written entirely in metric system of units.

It is hoped that this revised edition will prove useful to students preparing for degree examinations in civil engineering of all the Indian Universities, Diploma Examinations of the various Technical Boards, Certificate Courses, and also Associate Membership Examinations of professional bodies. It should also prove of interest and of practical value to practising engineers.

## CONTENT

### PART I : DESCRIPTION OF BRIDGES

- 1 : GENERAL INTRODUCTION AND TYPES OF BRIDGES
- 2 : PERMANENT BIG BRIDGES [SUPERSTRUCTURES]
- 3 : PERMANENT BIG BRIDGES [SUBSTRUCTURES]
- 4 : PERMANENT SMALL BRIDGES
- 5 : TEMPORARY BRIDGES  
[TEMPORARY FIXED BRIDGES]

### PART II : DESIGN, CONSTRUCTION AND MAINTENANCE

- 1 : CHOICE OF TYPE OF A BRIDGE
- 2 : GENERAL LAYOUT
- 3 : PERMANENT BIG BRIDGES [SUPERSTRUCTURES]
- 4 : PERMANENT BIG BRIDGES [SUBSTRUCTURES]
- 5 : PERMANENT SMALL BRIDGES AND TEMPORARY BRIDGES
- 6 : CONSTRUCTION AND MAINTENANCE

APPENDIX : BRIDGE ARCHITECTURE  
INDEX

**Catalogue Checklist**

**BRIDGE ENGINEERING**  
**DETAILED CONTENTS**

**PART I : DESCRIPTION OF BRIDGES**

**Chapter 1: GENERAL INTRODUCTION AND TYPES OF BRIDGES**

1	Introduction
2	Development of bridges
	(i) Availability of materials
	(ii) Advent of new materials
	(iii) Influence of pre-existing forms
	(iv) Advances in theory and in scientific experimental research
	(v) Advances in other branches of science
	(vi) Improvement of constructional methods
3	Some definitions
4	Component parts of a bridge
5	Deck, through and semi-through bridges
6	Span
7	Waterway and afflux
8	Classification of bridges
	IA Permanent big bridges
	IB Permanent small bridges
	IIA Temporary fixed bridges
	IIB Movable bridges
	Questions

**Chapter 2: PERMANENT BIG BRIDGES [SUPERSTRUCTURES]**

1	Girder bridges
	STEEL BRIDGES
	(i) Beam bridges
	(ii) Plate girder bridges
	(iii) Open web girder bridges or Truss bridges: Simply supported
	(iv) Open web steel bridges or Truss bridges: Continuous, cantilever and balanced cantilever
	(v) Combined usages of steel girder bridges
	R.C.C. GIRDER BRIDGES
	PRE-STRESSED CONCRETE GIRDER BRIDGES
2	Arch bridges
	MASONRY ARCH BRIDGES
	R.C.C. ARCH BRIDGES
	Deck type R.C.C. arch bridges
	Through type R.C.C. arch bridges
	STEEL ARCH BRIDGES
	Deck type steel arch bridges
	Through and semi-through steel arch bridges
	PRE-STRESSED CONCRETE ARCH BRIDGES
3	Suspension bridges
4	Rigid frame bridges
	R.C.C. RIGID FRAME BRIDGES
	STEEL RIGID FRAME BRIDGES
5	Expansion provisions in bridge floors
	Questions

**Chapter 3: PERMANENT BIG BRIDGES [SUBSTRUCTURES]**

	PIERS
1	Piers for girder bridges
	SOLID PIERS
	(i) Masonry piers
	(ii) R.C.C. piers
	OPEN PIERS
	(i) Cylindrical piers
	(ii) Column bents
	(iii) Pile bents
	(iv) Trestle bents
2	Piers for arch bridges
3	Piers for suspension bridges
4	Piers for rigid frame bridges
	ABUTMENTS
5	Abutments for girder bridges and arch bridges
	Masonry abutments

	R.C.C. abutments
	WING WALLS
6	General classification of wing walls
7	Masonry wing walls
8	R.C.C. wing walls
9	Types of approaches
	FOUNDATIONS
10	Foundations to approaches
11	Foundations to piers and abutments
	Spread foundations
	Pile foundations
	Caissons
12	Cofferdams
	Questions

**Chapter 4: PERMANENT SMALL BRIDGES**

1	Culverts
	Pipe culverts
	Box culverts
	Arch culverts
	Slab culverts
	Culverts with beams
2	High level causeway
3	Low level causeway
4	Conditions to be satisfied to justify the construction of a causeway
5	Data to collected for a causeway
	Questions

**Chapter 5: TEMPORARY BRIDGES [TEMPORARY FIXED BRIDGES]**

1	Introductory
2	Materials and fastenings for temporary bridges
3	Causeways and metal dips
4	Wooden bridges
	Superstructure
	Substructure
5	Suspension bridges
	(i) Ramp bridge
	(ii) Trestle suspension bridge
	(iii) Sling bridge
6	Floating bridges
	Boat bridge
	Pontoon bridges and raft bridges
7	Movable bridges
	(i) Swing bridge
	(ii) Bascule bridge
	(iii) Traverser bridge
	(iv) Transporter bridge
	(v) Life bridge
	(vi) Flying bridge
	(vii) Cut boat bridge
	Questions

**PART II : DESIGN, CONSTRUCTION AND MAINTENANCE OF BRIDGES**

**Chapter 1: CHOICE OF TYPE OF A BRIDGE**

1	Introductory
2	Deck and through bridges
3	Submersible and non-submersible bridges
4	Temporary and permanent bridges
	PERMANENT BIG BRIDGES
	– CHOICE OF SUPERSTRUCTURES
5	Choice between main types
6	Girder bridges
	Steel girder bridges
	R.C.C. girder bridges
	Pre-stressed concrete girder bridges
7	Arch bridges
8	Suspension bridges
9	Rigid frame bridges
	PERMANENT BIG BRIDGES
	– CHOICE OF SUBSTRUCTURES

**BRIDGE ENGINEERING**  
**DETAILED CONTENTS**

- 10 Piers, abutments and wing walls
- 11 Approaches
- 12 Foundations
- PERMANENT SMALL BRIDGES
- 13 Comparison of various types
- TEMPORARY BRIDGES
- 14 Temporary fixed bridges
- 15 Movable bridges
- Questions

**Chapter 2: GENERAL LAYOUT**

- 1 Site selection
- 2 Alignment
- 3 Waterway for average and big bridges  
Determining high floor discharge in case of non-submersible bridge and normal floor discharge in case of submersible bridge
  - I Direct method
  - II Indirect methodComputing waterway area
- 4 Lineal waterway and afflux
- 5 Waterway for small bridges
- 6 Determining of spans
- 7 Economic span
- 8 Free board
- 9 Clearances
- 10 Depth of foundations
- Questions

**Chapter 3: PERMANENT BIG BRIDGES [SUPERSTRUCTURES]**

- 1 Introductory
- 2 Layouts and approximate designs of some features of the superstructures
  - Girder bridges
  - Arch bridges
  - Suspension bridges
  - Rigid frame bridges
- 3 Forces acting on the superstructure and codes of practice
- LOADING ON BRIDGES
- General
  - I Buoyancy pressure
  - II Centrifugal forces
    - (1) Road bridges
    - (2) Railway bridges
  - III Dead load
    - (1) Unwin's formula
    - (2) American formula for plate girders
    - (3) American formula for trusses
    - (4) R.C.C. arches
    - (5) R.C.C. slab bridges upto 6 m span
    - (6) R.C.C. slab and T beam bridges
  - IV Deformation stresses
  - V Earth pressure
  - VI Erection stresses
  - VII Impact load
    - For road bridges
    - For railway bridges
  - VIII Live load
    - For road bridges
    - For railway bridges
  - IX Longitudinal forces
    - For road bridges
    - For railway bridges
  - X Secondary stresses
  - XI Seismic load
  - XII Temperature variation forces
  - XIII Water pressure
  - XIV Wind load
    - For road bridges
    - For railway bridges
- Questions

**Chapter 4: PERMANENT BIG BRIDGES [SUBSTRUCTURES]**

- 1 Introduction
- 2 Practical considerations and usual practices
  - Piers
  - Abutments
  - Approaches
  - Wing walls
  - Foundations
- 3 Forces acting on piers, abutments and wing walls
  - Dead load
  - Live load and impact
  - Wind load
  - Longitudinal and lateral loads
  - Water pressure
  - Buoyancy and uplift
  - Earth pressure and live load surcharges
  - Seismic load
- 4 Modes of failure and conditions of stability
- 5 Design of foundations
- 6 Materials used for abutments, piers and wing walls
- Questions

**Chapter 5: PERMANENT SMALL BRIDGES AND TEMPORARY BRIDGES**

- 1 Introduction
- 2 Culverts
- 3 Design of causeways
- 4 Wooden bridges
- 5 Suspension bridges
- 6 Floating bridges
- 7 Movable bridges
- Questions

**Chapter 6: CONSTRUCTION AND MAINTENANCE**

- 1 Introductory
- 2 Steel girder bridges
  - Fabrication
  - Erection
- 3 R.C.C. and pre-stressed concrete girder bridges
- 4 Arch bridges
- 5 Suspension bridges
- 6 Rigid frame bridges
- 7 Piers and abutments for big bridges
- 8 Approaches and foundations
- 9 Permanent small bridges
- 10 Temporary bridges
  - Wooden bridges
  - Suspension bridges
- 11 Movable bridges
- 12 Testing of bridges
  - Testing of a girder bridge
- 13 Rating of existing bridges
- 14 Posting of bridges
  - Load limit postings
  - Speed postings
- 15 Strengthening of bridge superstructure
  - R.C.C. slab bridges
  - R.C.C. beam and slab bridges
  - Masonry arches
  - Steel bridges
  - Continuous bridges
  - Suspension bridges
- 16 Widening the bridges
- 17 Maintenance of bridges
- Questions

**Appendix: BRIDGE ARCHITECTURE**

- Introduction
- Function, fitness and truth
- Unity
- Definition
- Infection
- Line
- Mass
- Conclusion

**Index**
