

CONSTRUCTION OF STRUCTURES AND MANAGEMENT OF WORKS

By Rangwala

 Edition
 : 5th Edition : 2018 (First Reprint)

 ISBN
 : 9789380358499

 Binding
 : Paperback

 Pages
 : 280 + 16 = 296

 Size (mm)
 : 240 × 12 × 170

 Weight
 : 385 g

ABOUT THE BOOK

Modern construction activities involves complex processes which requires knowledge of both construction and management. For this, engineers and technicians with managerial qualities are highly essential. This text-book will be helpful to the reader to be conversant with the elementary principles about construction management and organization; economic activities associated with the construction industry as a whole.

The entire subject matter is systematically arranged in a lucid manner, easy-to-follow style and in chapters like: Introduction; CPM and PERT; Construction of Dam; Construction of Multi-Storeyed Buildings; Erection of Steel Structures; Tunnelling; Compressed Air; Construction Equipments; Construction Accidents; Management and Organization; Construction Labour; Construction Materials; Economic Analysis; Miscellaneous Topics; etc.

Now, the topics of the subject are covered in 14 well-arranged chapters and therein, it contains:

- * 104 Self-explanatory and neat diagrams
- * 56 Solved problems
- * 81 Useful tables
- * 248 University-type questions at the end of each chapter.

It is hoped that the books will satisfy the needs of the civil Engineering students preparing for the Degree examinations of almost all the Indian Universities, Diploma examinations conducted by various Boards of Technical Education, Certificate Courses as well as for the A.M.I.E, U.P.S.C., G.A.T.E., I.E.S and other similar competitive and professional Examinations. It should also be of an immense help to the practising Civil Engineers.

CONTENT

1 : INTRODUCTION

2 : CPM AND PERT

3 : CONSTRUCTION OF DAM

- 4 : CONSTRUCTION OF MULTI-STOREYED BUILDINGS
- 5 : ERECTION OF STEEL STRUCTURES
- 6 : TUNNELLING
- 7 : COMPRESSED AIR
- 8 : CONSTRUCTION EQUIPMENTS
- 9 : CONSTRUCTION ACCIDENTS
- 10: MANAGEMENT AND ORGANIZATION
- 11 : CONSTRUCTION LABOUR
- 12 : CONSTRUCTION MATERIALS
- 13 : ECONOMIC ANALYSIS
- 14 : MISCELLANEOUS TOPICS

Checklist

Chapter 1 INTRODUCTION

- 1-1. General
- 1-2. Need for construction management
 - Co-ordination between different agencies (1)
 - (2)Development of manpower and machinery
 - Economy in construction (3)
 - (4)Speed of construction
 - (5)Quality control of materials and workmanship
- 1-3. Scope of construction management 1-4. Aspect of construction management
- 1-5. Job layout
 - General principles (1)
 - (2)Factors governing the layout of a construction project
 - (3) Advantages of job layout
- 1-6. Engineer and construction economy
- Contractor and construction economy 1-7.
- 1-8. Construction cost
 - Major factors, (2) Minor factors (1)
- 1-9. Cost control records
 - Material-cost record (1)
 - Material-cost statement (2)
 - (3) Labour-cost record
 - Labour-cost statement (4)
 - (5) Time keeper field sheet
 - (6) Payroll record
- 1-10. Financing the project
- 1-11. Cost index or price index
 - General (1)
 - Procedure of preparing the cost index or price index (2)
 - Uses of cost index (3)
- (4) Drawbacks of cost index
- 1-12. Construction operations
- 1-13. Stages in construction
- Pre-tender stage (1)(2)Post-tender stage
- 1-14. Planning the project
 - Construction schedule (1)
 - Material schedule (2)
 - Equipment use schedule (3)
 - (4)Labour schedule
- 1-15. Project Management Triangle (1) General, (2) Time
 - Cost, (4) Scope (3)
- 1-16. Project management activities
- 1-17. Construction cost control
- 1-18. Project supervision
- 1-19. Project control
- 1-20. Project evaluation
- 1-21. Construction camp
 - (1)Environmental conditions Physiological limitations (2)**QUESTIONS** 1

Chapter 2 CPM AND PERT

- 2-1. General
- 2-2. Network analysis
- 2-3. Features of network planning
- Rules for network diagram 2-4
- Procedure for CPM 2-5.
 - Project breakdown (1)
 - (2)Network diagram
 - (3)Utility data with respect to time and cost
 - (4)Determination of critical path
 - (5) Activity times and floats
 - (6)Scheduling
- 2-6. Advantages of CPM
- 2-7.Uses of CPM
- 2-8. Application of CPM in project management
- 2-9.CPM for determining extension of time
- 2-10. Difficulties in implementation of the CPM (1)
 - Lack of knowledge of the subject
 - (2)Literature on the subject (3) Unwillingness of contractors
- 2-11. Project cost
 - (1) Indirect cost, (2) Direct cost

Charotar Publishing House Pvt. Ltd. Opposite Amul Dairy, Old Civil Court Road, Anand 388 001 India

🔕 +91 99249 78998 🖾 charotar@cphbooks.com, 📾 https://cphbooks.in

- 2-12. Cost-time optimization
- 2-13. Cost slope
- 2-14. Optimization by crashing
- 2-15. Updating an arrow diagram
- 2-16. Time-grid diagram method Utility of the Time-grid diagram method
 - Advantages of the Time-grid diagram
- 2-17. Programme Evaluation and Review Technique (PERT)
- 2-18. Terminology Used in PERT
 - (1) A PERT event
 - (2) A predecessor event
 - (3) A successor event
 - (4) A PERT activity
 - (5) Critical Path, (6) Critical Activity
 - (7) Lead time, (8) Lag time
 - (9)Slack, (10) Fast tracking
 - (11)Crashing critical path
 - (12) Total Float, (13) Free float
 - (14) Optimistic time or best time (T_1)
 - (15) Most likely time or probable time (T_2)
 - (16) Pessimistic time or worst time (T_{2})
 - (17) Expected time (T_e)
 - Aspects of the probability curve
- 2-19. Percentage of probability
- 2-20. Implementing PERT 2-21. PERT network scheduling
- 2-22.
- Slacks of events
- 2-23. Negative slack and negative float

Chapter 3 CONSTRUCTION OF DAM

Rigid dams or masonry dams

(2) Foundations of a rigid dam

(6) Uplift and drainage galleries

(7) Causes of failure of masonry dams

Construction details

(9) Types of masonry dams

Non-rigid dams or earth dams

(3) Foundation of an earth dam

Drainage of earth dam

Section of an earth dam

Equipments for earth dam

(16) Causes of failure of an earth dam

(5) Steel dams, (6) Timber dams

(17) Advantages of non-rigid or earth dams

(1) Composite dams, (3) Hydraulic fill dams Compound dams, (4) Rock fill dams

Follow us:

(f) /charotar (y) /cphpl1511 () /charotarpub (in) /in/charotar/

(12) Density control of earth fill

(13) Post construction inspection (14) Protection of upstream slope

Stability of soils

Miscellaneous dams

QUESTIONS 3

(1) Types of earth dams

(2) Theory of earthwork

(7) Performance of drains

Closure of dam

(8) Preventive measures

(1) Requirements of a good site for a rigid dam

(10) Comparison of different types of rigid dams

(6) Precautions during construction of drains

Materials for earth dam construction

Method of construction of earth dam

Advantages of masonry dams as compared to earth dams

Disadvantages of masonry dams as compared to earth dams

- 2-24. Selection of technique
- 2-25. Bar charts or Gantt charts

QUESTIONS 2

Types of dams

Mile-stone charts 2-26.

General

(8)

(9)

(10)

(11)

(15)

(2)

3-5.

3-1.

3-2.

3-3.

3-4.

2-27. Resources planning 2-28. Resource allocation 2-29. Resource levelling

Chapter 4 CONSTRUCTION OF MULTI-STOREYED BUILDINGS

- 4-1. General
 - (1) Advantages, (2) Disadvantages
- 4-2. Trends in multi-storeyed buildings
- 4-3. Essential amenities
- 4-4. Framed structures
 - (1) General
 - (2) Advantages of framed structures
- Placing concrete in cold weather 4-5.
 - (1) Curing, (5) Water-cement ratio
 - (2) Formwork, (4) Temperature
 - (3) Protection
- Placing concrete in hot weather 4-6.
 - (1) Addition of chemicals
 - (2) Cooling of materials
 - (3) Deposition of concrete
 - (4) Protection after placing
 - (5) Watering formwork
- 4-7. Points to be observed while supervising R.C.C. work
 - (1) Cement
 - (2) Fine aggregate
 - (3) Coarse aggregate
 - (4) Water
 - (5) Proportion
 - (6) Reinforcement
 - (7) Centering
 - (8) Mixing
 - (9) Transporting and placing
 - (10)Consolidation
 - (11) Curing
 - (12) Finishing
- 4-8. Quality control of concrete 4-9.
 - Repairs and maintenance of concrete structure
 - (1) Dry pack method
 - (2) Concrete replacement
 - (3) Mortar replacement by guniting
 - (4) Epoxy mortars
- 4-10. Preparation of concrete surface for repairs
- 4-11. Horizontal expansion and vertical expansion
- 4-12. Problems of tall buildings
 - (1) Earthquake effect
 - (2) Fire protection (3) Lifts

 - (4) Living
 - (5) Noise control
 - (6) Services (7) Wind effect
- 4-13. Precautions to be taken during the construction of multi-storeyed buildings
 - (1) Road with heavy traffic
 - (2) Safety of adjoining properties
 - (3) Working in restricted space
 - **QUESTIONS** 4

Chapter 5 ERECTION OF STEEL STRUCTURES

- 5-1. General
- 5-2. Equipments required for erection of steel structures 5-3. Joints
 - (1) Riveted joints
 - (2) Bolted joints, (3) Welded joints
 - Types of resistance welding Strength of welded joints
 - Defects of welded joints
 - Checking of welded joints
 - Cost of erection of steel structures
- 5-4. 5-5. Erection procedures of steel structures
 - (1) Factory shed
 - (2) Multi-storeyed building
 - (3) Water tank towers
 - (4) Portal frames, (5) Bins and silos
 - (6) Steel girders for bridges
- Safety rules during erection of steel structures 5-6. **QUESTIONS 5**

Charotar Publishing House Pvt. Ltd. Opposite Amul Dairy, Old Civil Court Road, Anand 388 001 India

- **Chapter 6 TUNNELLING**
- 6-1. Definition
- 6-2. Advantages of tunnelling
- 6-3. Economics of tunnelling
- 6-4 Selection of route
 - (1) Geological conditions
 - (2) Right of way
- 6-5. Tunnel surveying
- Tunnelling through rock 6-6. (1) Full face method
 - - (2) Heading and bench method
 - (3) Cantilever car dump method
 - (4) Drift system
 - (5) Pilot tunnel method
 - Tunnelling through soft ground
 - (1) Forepoling method
 - (2) Needle beam method
 - (3) Five-piece set method
 - (4) Liner plates method
 - (5) Other methods
 - Methods of tunnelling through sub-aqueous strata
 - (1) Shield tunnelling
 - (2) Plenum process or compressed air tunnelling
 - Drainage of tunnels
 - (1) Sumps and pumps
 - (2) Grouting, (3) Pilot tunnel
- 6-10. Ventilation of tunnels
- 6-11. Lighting

6-7.

6-8.

6-9.

- 6-12. Shafts
 - (1) Drilling, (2) Raising

(3) Mucking machines

(4) Tractor loaders

6-16. Size and shape of tunnels

Chapter 7 COMPRESSED AIR

Uses of compressed air

(1) Absolute pressure

(4) Compression ratio

(15) Discharge pressure

Cost of compressed air

Compressed air plant

Compressor efficiency

Volumetric efficiency

Adiabatic compression

(11) Diversity factor, (12) Aftercooler (13) Intercooler, (14) Inlet pressure

(16) Theoretical H.P., (17) Brake H.P.

Absolute temperature

(1) Air pressure, (2) Capacity

Flexibility, (4) Layout

Number, (6) Receivers

Chapter 8 CONSTRUCTION EQUIPMENTS

Type of installation

Classification of equipments

Intermittent type

Mixed type

Selection of equipments

Continuous flow type

Follow us:

(7) Isothermal compression

(2) Gauge pressure

(3) Air compressor

QUESTIONS 6

Some definitions

(10) Load factor

- (3) Gloryholing
- 6-13. Mucking (1) Manual labour, (2) Power shovels

6-14. Hauling

7-1.

7-2.

7-3.

7-4.

7-5.

7-6.

7-7.

8-1.

8-2.

8-3.

6-15. Lining of tunnels

General

(5)

(6)

(8)

(9)

Gas laws

(3)

(5)

(7)

(1)

(2)

(3)

General

Size of pipes

QUESTIONS 7

- 8-4. Standard equipments
 - (1) Initial investment
 - (2) Purchase period
 - (3) Reliability in operation
 - (4) Repairs
 - (5) Resale value
 - (6) Use

8-5

8-8.

- Special equipments
- 8-6. Owning and operating
 - Cost of equipment
 - (1) Depreciation
 - (2) Investment charges
 - (3) Maintenance and repairs
 - (4) Operation cost
- 8-7. Economic life of construction equipments
 - (1) Depreciation
 - (2) Downtime
 - (3) Inadequacy
 - (4) Normal deterioration
 - (5) Obsolescence
 - (6) Working method
 - Sources of equipments
 - (1) Direct purchase
 - (2) Hiring
- 8-9. Various types of construction equipments
- 8-10. Excavating equipments
 - (1) Tractor
 - (2) Bulldozer and angle-dozers
 - (3) Grader
 - (4) Scraper
 - (5) Excavators
 - (6) Dredgers
 - (7) Ripper or rooter or scarifier
 - (8) Trencher or ditcher
- 8-11. Earth compaction equipments
 - (1) Rollers
 - (2) Vibratory compactors
 - (3) Earth rammers
 - (4) Jetting and pounding
- 8-12. Hauling equipments
 - (1) Trucks
 - (2) Tractors
 - (3) Dump Trucks
 - (4) Dumpers
 - (5) Trailers
 - (6) Elevators and conveyors
- 8-13. Hoisting equipments
 - (1) Cranes
 - (2) Cableways
 - (3) Gantries
 - (4) Gin poles
 - (5) Hoists
 - (6) Pulley blocks
 - (7) Winches
- 8-14. Conveying equipments
 - Belt conveyors
 Ropeways
- 8-15. Pumping equipments
 - (1) Air lift pumps
 - (2) Centrifugal pumps
 - (3) Displacement pumps
 - (4) Miscellaneous pumps
- 8-16. Concrete construction equipments
 - (1) Concrete buckets
 - (2) Concrete mixers
- 8-17. Drilling equipments
 - (1) Selection of drilling equipment

- (2) Selection of drilling pattern
- (3) Drilling rate
 - (4) Types of drills
 - (5) Drill bits
- (6) Laser drilling Road making equipments
- 8-18. Road making equipme QUESTIONS 8

Chapter 9 CONSTRUCTION ACCIDENTS

- 9-1. General
- 9-2. Causes of construction accidents
 - (1) Control of men, equipment and materials
 - (2) Failure of temporary structures
 - (3) Inherent engineering hazards
 - (4) Personal hazards
- 9-3. Classification of construction accidents
 - (1) According to the cause of occurrence
 - (2) According to the nature of injury sustained
 - (3) According to the severity of injury
- 9-4. Injury-frequency rate
- 9-5. Injury-severity rate
- 9-6. Injury-index
- 9-7. Equivalent time charge
- 9-8. Compensation insurance 9-9 Accident costs
 - -9. Accident costs
 - (1) Tangible costs(2) Intangible costs
 - (2) Intaligible co
- 9-10. Safety programme
- 9-11. Rules for preventing construction failures QUESTIONS 9

(2) Line and staff system

10-12. Organization of a construction company

Functional activities

Service functions

Staff functions Welfare activities

Co-ordination

10-11. Systems of staff organization

Line system

(3) Functional system

10-10. Principles of organization

(3) Private services

Supervision

- 10-2. Functions of management
 - Co-ordination of factors of production
 Innovation, (3) Marketing

Organization, (6) Risk-taking

Technical skill, (3) Human skill

10-7. Conditions essential for carrying on business

Free and competitive market

- (1) Top management
- (2) Middle management
- (3) Lower management
- 10-17. Functions of construction management
 - (1) Planning, (2) Organizing
 - (3) Staffing, (4) Directing
 - (5) Controlling
 - **OUESTIONS 10**

Chapter 11 CONSTRUCTION LABOUR

- 11-1. General11-2. Immobility of labour
 - (1) Difficulty of acquiring knowledge
 - (2) Leaving accustomed surroundings
 - (3) Reluctance to enter certain occupations
- 11-3. Theories of wages
 - (1) Subsistence theory of wages
 - (2) Wages-fund theory of wages
 - (3) Bargaining theory of wages
- 11-4. Nominal wages and real wages
- 11-5. Psychic income
- 11-6. Systems of wage payments
 - (1) Time wage system
 - (2) Piece wage system
- 11-7. Incentive plans
 - (1) Halsey plan, (2) Rowan plan
 - (3) Taylor's differential piece wage plan
 - (4) Merrick differential or multiple piece rate plan
 - (5) Emerson's efficiency plan
 - (6) Gantt's task and bonus plan
 - (7) Bedeaux point premium plan
 - (8) Hayne's plan
 - (9) Priestman bonus system
 - (10) Barth variable sharing plan
 - (11) Group incentive plans
- 11-8. Payment by result
 - (1) Differential piece rate
 - (2) Group bonus system
 - (3) Piece rate with a guaranteed time wage
 - (4) Premium bonus plans
 - (5) Straight piece-rate
- 11-9. Profit-sharing
 - (1) Procedure
 - (2) Advantages (3) Disadvantages
- 11-10. Morale
- (1) Interviews, (2) Opinion survey
- 11-11. Trade unions
 - (1) Functions, (2) Advantages
 - (3) Disadvantages
 - (4) Trade union and wages
- 11-12. Labour welfare
- 11-13. Indian labour
 - (1) Absentism, (2) Factory conditions
 - (3) Housing, (4) Indebtness
 - (5) Migrating character
 - (6) Standard of living
 - (7) Wages, (8) Working hours
 - **QUESTIONS** 11

Chapter 12 CONSTRUCTION MATERIALS

- 12-1. General
- 12-2. Types of materials
- 12-3. Storage of materials
 - (1) Cement, (2) Formwork
 - (3) Inflammable materials
 - (4) Plant and machinery
 - (5) Ready articles, (6) Steel
- 12-4. Stores
 - (1) Divisions
 - (2) Internal transport (3) Layout
 - (4) Location
 - (5) Material chart
 - (6) Sectionalisation
 - (7) Storage of materials
